

Toaster

Dualit Classic Vario — 4 slot

07

On the worktop. A Dualit works a little differently to most toasters — there is no pop-up and no cancel button.

MAKING TOAST

- 1 Use the slot selector to choose how many slots you want to toast.
- 2 Turn the timer dial clockwise: **1.5** lightly browned, **2.0** medium, **2.5** well done.
- 3 Lower the bread with the lever.
- 4 The timer runs down and stops on its own.
- 5 To stop early, turn the dial back to 0 by hand.

FROZEN BREAD

- 1 Set the dial to the defrost symbol and let it run down to 0.
- 2 Wait about 20 seconds, then toast as normal.

GOOD TO KNOW

From cold the first round browns less. Turn the dial to its full extent and drop the bread in when it reaches 2.5.

SAFETY

- Never put a knife or fork into the slots.
- Please switch it off at the wall after use and let it cool before storing.
